Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this

Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by either Yamada et al. (U.S. Patent No. 5,254,448) or Takeuchi et al. (U.S. Patent No. 4,347,308).

Yamada et al. (columns 20-21) and Takeuchi et al. (column 4) each disclose a silver halide photographic light-sensitive material comprising a support having thereon at least one light-sensitive silver halide emulsion layer, said material containing a fluorine-containing surfactant inclusive of the compound of the instant formula (I).

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Art Unit: 1752

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-10 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims of copending Patent Application Publication No. 2003/0211430. Although the conflicting claims are not identical, they are not patentably distinct from each other because both sets of claims are drawn to a silver halide photographic light-sensitive material comprising a support having thereon at least one light-sensitive silver halide emulsion layer, said material containing a fluorine-containing surfactant inclusive of the compound of the instant formula (I).

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Prior Art

5. The following prior art made of record and not relied upon is considered pertinent to applicants disclosure: U.S. Patent Application Publication No. 2004/0058284 (formula(I); column 99).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Geraldine V Letscher whose telephone number is (571) 272-1334. The examiner can normally be reached 7:30am to 4:00pm.
